Profile Summary

Analytics Engineer with 7+ years of experience building and scaling **modern data platforms** at terabyte scale. Expert in **dbt, BigQuery, Snowflake, Stitch, Airflow, Python and SQL**, with proven impact in performance optimization, cost reduction, and automation. Trusted as a Staff-level IC for technical leadership, mentoring, and data modeling best practices

- Modeled **4TB+ datasets in BigQuery/dbt** → **50% faster queries, 25% lower storage costs**.
- Built **Stitch pipelines** across 20+ sources → **90% fewer manual interventions**.

Work Experience

- **Senior Analytics Engineer — AlphaSense** *Pune, India | Dec 2022 – Present*
 - **Architected pipelines with Stitch**, automating ingestion from 20+ data sources.
 - Modeled **4TB+ datasets in BigQuery/dbt** → **50% faster queries, 25% lower storage cost**
 - Migrated **400+ models from Dataform** → **dbt** → standardized KPIs, reduced reporting errors by **70%**.
 - Automated QA with **dbt tests + Python validation** → strengthened data trust and reduced errors.
 - Created **GitHub Actions automation** for dbt PR refreshes → eliminated manual intervention, saving 30–40 mins daily.
 - Championed **cost optimization initiative** → cut BigQuery compute/storage spend by **30%**.
 - Led **code reviews, training, and onboarding** → boosted team proficiency by **20%** and reduced onboarding ramp-up by **45%**
 - Built **Finance and product dashboards in dbt + BigQuery** with Finance/Product teams → reporting time cut by **30%**, established single source of truth.
- **Analytics Engineer — GreatLearning** *Bangalore, India | Dec 2020 – Dec 2022*
 - Designed ELT pipelines (**Airflow, Python, SQL**) → **40% faster execution, 50% reduced storage complexity**.
 - Built **SQL and Python based data marts** powering dashboards in **Metabase** → provided visibility into NPS, attrition, and learner KPIs.
 - Designed KPIs for **NPS, attrition, query resolution** dashboards in Metabase → improved decision-making visibility.
 - Built ML attrition model → **96% precision, 95% recall**; analyzed financial datasets to surface retention drivers.
 - Automated processes with **AWS EC2 + Crontab**, saving **10+ hours/month** in recurring work.

- Created **SLA-based email triggers** → improved productivity and compliance tracking.
- Led daily stand-ups, mentored new hires, and introduced **version control practices for SQL/Python pipelines**.

- **Data Scientist — BrandzOnWeb**

Nasik, India | Oct 2018 – Dec 2020

- Built classification models (SVM, Logistic Regression) → achieved **83.5% accuracy** for tenant selection.
- Conducted **EDA, hypothesis testing, dimensionality reduction** → reduced model runtime by **15%**.
- Built **Tableau dashboards** for renewable energy projects → enhanced sustainability reporting and decision-making.
- Collaborated in Agile teams → contributed to sprint planning, reviews, and cross-functional communication.

Skills and Knowledge

- **Analytics Engineering & Warehousing:** dbt, BigQuery, Snowflake, Airflow, **Stitch (primary)**, Fivetran, Data Modeling (Star/Snowflake), ELT/ETL Pipelines
- **Programming:** Python (Pandas, NumPy, Scikit-Learn), SQL, C++
- **AI/ML:** Predictive Modeling, NLP, Neural Nets, ML Ops Basics
- **BI & Visualization:** Looker, Tableau, Metabase
- **Other:** Git, CI/CD, Agile, Data Quality Frameworks, Stakeholder Collaboration
- **Additional Tools:** Jupyter, VS Code, PyCharm, Notion, Confluence, Lucidchart

Education

Post Graduate Program in AI & ML — University of Texas at Austin + GreatLearning (2019–2020)

B.E. in Information Technology — University of Pune (2015–2018)

Publications and Certifications

- Introduction to Kafka, Great Learning Academy (August 2020)
- Data Visualization using Tableau, Great Learning Academy (July 2020)
- Presented and Published an IEEE paper on “Using software testing approach to improve digital circuit testing” at INDIAcom 2017 IEEE conference in March 2017, Delhi.
